SUMMARY

Passionate about the intersection of AI, Python, and DevOps. Proven ability to develop and deploy Python-based applications while implementing efficient DevOps workflows. Committed to continuous learning and applying AI principles to solve complex problems.

EDUCATION

Bachelor of Engineering Program in Software Engineering

Thammasat University | 2020

PUBLICATION

"Comprehensive Benchmarking and Analysis of Open Pretrained Thai Speech Recognition Models," 27th International Conference of the Oriental COCOSDA (O-COCOSDA 2024), Hsinchu, Taiwan, 2024, IEEE.

EXPERIENCE

Front End Developer Internship

Smartclick Solution | June 2023 - July 2023

- Using version control systems (e.g., Git) to manage code and collaborate with other developers
- Writing and maintaining HTML and CSS code to create the layout and styling of web pages.
- Collaborating with designers and user experience experts to create intuitive and user-friendly interfaces

AI Engineer Internship

National Electronics and Computer Technology Center (NECTEC) | Jan 2024 - Dec 2024

- develop speaker verification system CI/CD on Googlecloud and Collaborating with designers and user experience
- develop Service for Pathumma LLM (Audio LLM)
- realtime transcription service
- data scraping from youtube
- develop service for conference transcription

AI Automation

Maverix Group | July 2025 - now

- AI Agent Development: Designed and deployed a custom AI administrative agent to integrate Inflow with ClickUp, streamlining data synchronization between inventory management and project workflows.
- KPI Automation: Engineered an automated data pipeline to extract performance metrics from ClickUp, enabling real-time generation of Key Performance Indicators (KPIs) and eliminating manual data entry.
- Process Optimization: Reduced administrative overhead by automating cross-platform communication, ensuring up-to-date data accuracy for stakeholders.

SKILLS

- Programming Languages: Python, Java, JavaScript, HTML/CSS, PHP, MySQL
- OS: Window , Ubuntu, Centos
- Tools: AWS, Azure, VMware, VirtualBox, Docker, VScode, Eclipse, Git, Github, Figma, Lucidchart, Bootstab, Xampp,N8N
